

Abuntex Introductory Course

Course Duration: 2 Days

This interactive two day course is designed to enable delegates to maximize the features and functionality of the Abuntex estimating system. Abuntex is constantly evolving and this course allows you to take a “hands on” approach to constructing your own assessments and gain an understanding of how to use the system to its full potential. This course is ideal for new and existing Abuntex users.

Course Objectives:

- Learn how to turn practical body shop repair skills into professional comprehensive vehicle damage assessments using the Abuntex system
- Understand how to use system features and functionality to maximum effect
- Increase efficiency as a vehicle damage assessor-/estimator.
- Attain the skills required to achieve your Abuntex Certification.

Course Format:

- Navigation of the Abuntex system
- AudaVin
- AudaFile
- Basic Repair Methods
- Repair Modification Codes
- Paint-Paint Repair Methods
- Repair Tips
- Phantom Calculation
- AudaMail
- AudaImage
